05 • USAGE NOTES

- Logos are baked on black — use on the dark site background (#0A0E14 reads as one surface with them).
- Website hero/footer: `aquavalet-lockup-car.png` • sticky header: `aquavalet-wordmark.png` • favicon: `favicon-*.png`.
- AV monogram is favicon/social only — it stays out of the main site logo.
- Aqua (#29ABE2) is used sparingly: CTAs, links, one or two highlights per section.
- Business card: the full supplied logo with taglines (`new-logo.png`).
